Purina® RangeLand® Hi-Fat Tub

Hi-Fat for High Performance

When forages are deficient, your cows need additional energy to remain high-performing and productive. That's what your bottom line is all about.

The Purina® RangeLand® Hi-Fat Tub is a self-fed, high-protein, high-fat supplement. It is designed to overcome nutrient deficiencies in forages to support overall energy status and help maintain herd body condition.

**Available for
Year-Round Use**

1. Delivers additional protein and energy

- Provides balanced supply of nutrients to the rumen to support microbial activity in an effective, cooked molasses tub form

2. Differentiated fat source solutions

- Delivers 10% fat
- Manufactured with proprietary Macro Encapsulation Technology™ to create a high-energy nugget that delivers additional fat that helps maintain body condition and support reproduction
- Concentrated source of rumen-protected fats, which pass through the rumen to be absorbed as energy in the small intestines
- Use of non-animal based protein and fat sources for natural programs

3. Consistent intake

- Provides consistent nutrient delivery at 0.5–1.0 pound per head per day
- Convenient, self-fed form that saves time and labor

Help your cattle reach their fullest potential in changing forage conditions with the Purina® RangeLand® Hi-Fat Tub.
